

The HITRUST Common Security Framework (CSF) Assurance Program is the most widely adopted process and set of tools in the healthcare industry for evaluating an organization’s information risks and/or compliance state. Meditology has conducted hundreds of CSF risk assessments as well as HITRUST certification and certification support engagements.

Meditology’s HITRUST Certification Process

Meditology’s objective is to simplify the complexity of this multi-faceted engagement and deliver clear, organized and actionable results. Through this approach, Meditology is able to streamline the certification process by focusing on data-backed, known high risk areas and those controls defined to be “reasonable and appropriate” for our client environments. Our certification process includes the following steps:

HITRUST Certification and/or Certification Support Credentials

Our Commitment to Client Satisfaction

Meditology is an IT consulting company with an exclusive focus on healthcare. We have a core competence in IT Risk Management and expertise in HITRUST. Our reputation for client service excellence is based on the quality of our work products combined with the professionalism, approach, and innovative solutions we bring to our engagements.

“ We were looking for a partner to assist us in taking our risk management program to a new level. We chose Meditology because of their track record in healthcare and reputation in the region. Meditology's security operational experience, coupled with their knowledge of HIPAA, Meaningful Use, HITRUST, PCI and other security requirements was invaluable to help us map out our path forward. The project was professionally managed from start to finish and Meditology was able to effectively communicate with senior leadership to help us advance our program. We continue to look to Meditology to provide additional insight and assistance for security and privacy matters for our organization.

Interim CISO

Large Mid-Atlantic Health System

HITRUST Experience

- We are an accredited HITRUST CSF Assessor organization and have conducted hundreds of Security Risk Assessments based on the CSF.
- Our founder and managing Partner, Cliff Baker, served as Chief Strategy Officer and lead architect for HITRUST CSF.
- We partner with HITRUST Alliance to update the CSF, facilitate industry leadership meetings, and conduct training.
- We have successfully guided a number of clients through HITRUST adoption, certification, and recertification.
- We have successfully created 3-5 year HITRUST alignment and certification strategic plans for healthcare providers throughout the U.S.
- Several members of our leadership are “Big 4” alumni and understand the core processes and approaches to performing certification audits.

Leadership You Can Count On

Cliff Baker has over 20 years of industry experience. He was the lead architect of the HITRUST Common Security Framework, and author of various IT Risk Management publications. Prior to forming Meditology, Cliff was the Chief Strategy Officer for HITRUST and led PwC's healthcare security practice.

Brian Selfridge CISSP, HITRUST was most recently the CISO of a large health system prior to joining Meditology to oversee the IT Risk Management practice. Brian has over 12 years of experience in healthcare security, including consulting experience at PwC.

Nadia Fahim-Koster CISSP, HITRUST was the CISO at Piedmont Healthcare for 6 years before joining Meditology. Nadia has over 14 years of operational and consulting experience in healthcare security and privacy. She has performed several HITRUST based risk assessments for healthcare organizations around the country, including over 30 assessments and certification preparation for one of the largest healthcare insurance providers in the U.S.
