MEDITOLOGY SERVICES

Why Meditology for Assurance Services?

Experience the power of a proven partnership for HITRUST and SOC 2 assurance.

In the wake of a sharp uptick in vendor breaches and a steadily rising number of network-connected vendors, healthcare organizations have prioritized security certifications as part of the vendor contracting process. For vendors who are not certified, this can mean a significantly slower contracting process or exclusion from the consideration set altogether. For vendors who are certified, recertification comes with its own unique set of challenges.

Whether you're proactively pursuing your first HITRUST or SOC 2, meeting a customer contract requirement, or looking for a new partner to support recertification, Meditology's differentiated perspective, process, and partnership can bring new efficiency and effectiveness to your security certification effort.

A highly differentiated approach to assurance services.

Meditology is a certified HITRUST CSF assessor and an AICPA-accredited provider of SOC 2 auditing. With a proven approach to both HITRUST and SOC 2 assurance services, we carefully tailor our service offerings to meet each client's unique operational realities.

The partner you choose for certification assurance services is one of the most important choices you can make, with an impact on your ability to successfully attain certification while streamlining and simplifying the process.

Here are some of the things that set Meditology's assurance services apart.

Proven track record.

We have completed hundreds of successful HITRUST and SOC 2 engagements over the years for business associates ranging in size and complexity. Our track record stems from our in-depth understanding of certification controls and our attention to detail.

Experienced team.

Our experienced team has HITRUST knowledge spanning more than a decade, and many of them hold CSF and HQP designations. Several members of our leadership team are alumni of "Big 4" firms that understand best practices for certification audits.

Integrated efforts.

For organizations seeking both HITRUST and SOC 2 certifications, we can perform both engagements simultaneously in order to streamline the process and eliminate unnecessary duplicative efforts. In addition, we understand their relationship to other regulations, like HIPAA.

Rich collaboration.

We are committed to serving as true partners to our clients, taking the time to understand their unique requirements to deliver a highly differentiated and tailored assurance approach. Our collaborative way of working ensures transparency and understanding every step of the way.

Actionable approach.

We provide full transparency into scores and remediation actions to support client success. In addition, we include HITRUST i1 and SOC 2 Type 1 reports as part of our process to support you in meeting contracting requirements while the control period passes.

Dedicated focus.

Led by former healthcare CISOs that have walked in your customers' shoes, we are exclusively focused on addressing the unique complexities of the healthcare space. Our dedicated focus on healthcare enables us to tailor your assurance services to industry-specific demands.

Cybersecurity certifications made seamless.

HITRUST
Authorized CSF Assessor

The HITRUST CSF provides a comprehensive information risk management and compliance program for healthcare organizations and business associates.

Here are some of the things that set our HITRUST services apart:

- **We shaped the standard.** Our Founder and Managing Partner served as lead architect for the HITRUST CSF framework, and our team possesses CSF and HQP designations.
- **Our experience runs deep.** As an accredited assessor and member of the HITRUST Assessor Council, we possess valuable insight into HITRUST's current and future offerings.
- **We become a part of your team.** We offer staff augmentation support to aid in evidence gathering and documentation, saving your employees valuable time.
- **We leverage a proven approach.** Our HITRUST methodology is supported by tools, templates, and accelerators, which means we 'hit the ground running' for more efficient and cost-effective assessments.

AICPA SOC 2

SOC 2 Type 2 reports have increasingly become an expectation, if not a contractual requirement, for vendors to demonstrate their commitment to implementing and maintaining a security program.

Here are some of the things that set our SOC 2 services apart:

- **We know the right controls.** Our team of experienced SOC 2 testers can interpret nuanced aspects of the in-scope environment and the evidence required.
- **We fill in the gaps.** We deliver comprehensive remediation services to help your organization ensure compliance.
- **We streamline your results.** We efficiently deliver SOC 2 Type 1 reports to clients as they wait for the control period to pass.
- **We leverage a proven approach.** Our three-phased approach to SOC 2 audits includes SOC 2 Readiness Assessment, Gap Analysis and SOC 2 Type 1 Reporting, and SOC 2 Type 2 Reporting.

"Meditology saw us all the way through, as they always have. We got our certificate, ***they moved staff and timelines around, and they were very flexible in seeing us to the end.*** *We were very happy with the deliverables. And A+ for getting us to the HITRUST Certification. We are satisfied, our Board and Execs are happy."*

— Director of Security, Software Development Company

"We are a small, women-owned business, and going to SOC 2 Certification was a big step for us. A lot of the companies Meditology works with are larger than us, but our Meditology team was very accommodating and made the process work for us versus being Draconian. ***And they took the time to learn about our business and improve our security posture.*** *We are continuing to work with Meditology on HITRUST next, and that's why."*

— CISO, Healthcare Data Services Organization

About Meditology

Meditology is a best-in-class cybersecurity consulting and certification firm exclusively focused on the healthcare space. Our extensive knowledge of healthcare's regulatory, operational, clinical, and technical realities uniquely positions us to address your cybersecurity and compliance challenges. Meditology disrupts the status quo with a differentiated client experience that is highly responsive, deeply collaborative, and focused on results.
