THE TOP 10 HEALTHCARE CYBER RISK TRENDS FOR 2021

The next decade of healthcare cyber security, privacy, and compliance risks is starting to take shape as we bid a fond farewell to 2020.

01 PATIENT SAFETY & OPERATIONS
Healthcare shifts its focus toward patient safety and operational impacts of cyber events.

02 CLASS ACTION LAWSUITS
Class action lawsuits change the playing field for financial impacts related to cyber events.

03 REMOTE
Remote is the new normal: security and privacy impacts arise alongside the adoption of telehealth and telework models.

04 HACKING
Breach volume increases and hacking attacks escalate in healthcare.

05 NEW REGULATIONS
New privacy and security regulations and enforcement ramp up on state, federal, and global fronts.

06 THIRD-PARTY VENDOR RISK
Third-party vendor risk becomes a dominant focus for security programs.

07 CLOUD SECURITY
Cloud security emerges as its own specialized security domain.

08 ENTERPRISE RISK REPORTING
Enterprise risk reporting becomes the "must have" skill set for security leaders and programs.

09 INCREASED AUTOMATION
Increased automation of security processes and capabilities.

10 TALENT CONSTRAINTS
Staffing shortages for cyber talent continue along with the rise of managed security services.
