

SOC 2 Compliance Services for Healthcare Organizations

Why Meditology?

Meditology Services is a top-ranked provider of information risk management, cybersecurity, privacy, and regulatory compliance consulting services, exclusively for healthcare organizations. Our Meditology Assurance division is an AICPA accredited provider of SOC 1 and SOC 2 examinations.

Meditology Assurance SOC 2 attestation reports provide an industry-recognized seal of approval that validates your organization's compliance with security, availability, processing integrity, confidentiality, and/or privacy controls.

Meditology has performed SOC 2 examinations and other security and privacy engagements for healthcare organizations of all sizes, including the nation's premier healthcare organizations.

Why SOC 2?

Third-party security assurance including SOC 2 Type 2 reports have become a contractual requirement for third parties looking to do business with many of the nation's leading healthcare organizations.

Having a SOC 2 report may significantly reduce the information you need to provide to your customers as part of their vendor management process. SOC 2 reports also help demonstrate reasonable and appropriate compliance with regulatory requirements which apply to healthcare organizations.

A SOC 2 report is also an effective way to differentiate your organization from competitors who have not completed qualified assessments.

Meditology SOC 2 Compliance services include:

01 **Providing formal attestation of the design and operating effectiveness of controls based on the in-scope AICPA's Trust Services Criteria**

02 **Providing SOC 2 readiness assessments to provide your organization with potential gaps and remediation activities. Readiness includes:**

- Assisting with the creation, design, and documentation of desired controls within your organization's environment
- Providing remediation advice and guidance to allow you to close control and/or evidence gaps
- Identifying operational or documentational gaps within your existing control environment
- Performing testing of controls in advance of the formal SOC 2 examination

03 Providing non-attestation SOC 2 consulting services such as:

- Prior auditor SOC 2 Type 2 report review and recommendations
- SOC 2 Type 2 maintenance activities
- Assisting your organization with control documentation and evidence testing where another auditor is performing the SOC 2 examination
