

INCIDENT RESPONSE SERVICES FOR HEALTHCARE

Healthcare has become a top target for malicious actors bent on profiting from cyberattacks.

Ransomware events and other breaches have become commonplace for healthcare entities and organizations are often underprepared to deal with the magnitude of impact to the business from cyber events.

Cybersecurity incidents have wide-ranging impacts including patient safety, operational effectiveness, and regulatory compliance.

Meditology's Incident Response Services help healthcare entities limit the duration and impact of adverse security and availability incidents and improve the organization's resilience for inevitable security and IT events.

OUR INCIDENT RESPONSE SERVICES

- ✓ Facilitated incident response testing and tabletop exercises
- ✓ Incident Response Plan (IRP), policy, and procedure development
- ✓ Ransomware tabletop exercises and preparation
- ✓ Business Continuity and Disaster Recovery (BC/DR) tabletop exercises

OUR APPROACH

- ✓ Leverages leading practices from premier healthcare entities
